### FUND MANAGER COMMENTARY

In July 2019, IDR CII Equity Fund booked performance of -0.70% mom, in line with mixed movement of the three underlying markets in IDR (MXID performance of 0.5%, MXCN performance of -1.7%, MXIN performance of -6.4%). In last month, global market showed mixed performance with US market ended higher while Asian market ended lower amid back and forth swing in expectation on Fed decision and trade war development. Both market corrected together since the end of the month after Fed cut the benchmark rate but followed with statement which hinted that the cut is not a start for a trend and subsequent Trump tweet to put tariff on additional USD300bn import from China despite ongoing favorable discussion between the two countries. In domestic side, BI decided to cut the benchmark rate by 25bps. Going forward, China, India, and Indonesia equities will continue to depend on economic development, currency's stability, and global risks' dynamics.
