### FUND MANAGER COMMENTARY

In July 2019, IDR Growth Equity Syariah Fund booked performance of +0.04% mom, in line with ISSI performance of 0.5%. By sector inside ISSI, Materials was the largest positive contributor (1.4% mom), while Energy was the largest negative contributor (-0.9% mom). In last month, global market showed mixed performance with US market ended higher while Asian market ended lower amid back and forth swing in expectation on Fed decision and trade war development. Both market corrected together since the end of the month after Fed cut the benchmark rate but followed with statement which hinted that the cut is not a start for a trend and subsequent Trump tweet to put tariff on additional USD300bn import from China despite ongoing favorable discussion between the two countries. In domestic side, BI decided to cut the benchmark rate by 25bps. Going forward, Indonesia Equity market will continue to depend on domestic economy development, USD/IDR currency movement and global risks' dynamics.
