FUND MANAGER COMMENTARY

The managers maintain a defensive stance as markets continue to send mixed signals. They remain focused on balancing income with risk but are also allocating tactically to take advantage of opportunities arising from volatility and market dislocation. At the asset group level, the allocation to Growth asset was increased slightly, while that to Yield asset and Defensive assets was marginally reduced. The portfolio managers continued to favor Asian high yield bonds as Chinese stimulus prospects remain in place and corporate fundamentals are fairly stable. They increased the allocation to emerging market debt (local currency) and added to the Euro.
