In October 2020, USD Onshore Equity Fund booked performance of +7.55% mom, in the same direction with MXID performance (in USD). By sector inside MXID, Financials was the largest positive contributor (4.5% mom), while Energy was the largest negative contributor (-0.2% mom). In last month, global equity market showed mixed performance with majority of the regions performed positively on the first half of the month, driven by improving clarity on US election direction. However, in the later part of the month, US and European markets were mostly corrected due to new wave of resurging Covid19 cases. In domestic side, market rebounded mainly driven by announcement of Omnibus Law approval. Going forward, Indonesia equity market will continue to depend on the development of global and domestic Coronavirus event, including number of cases, potential treatment and vaccines, and policy reaction including healthcare policy, stimulus, and support through recovery until post-Covid19 period.
