### FUND MANAGER COMMENTARY

In October 2021, the IDR Balanced Fund booked performance of +3.16%. In last month, global equity market rebounded from the previous month correction, likely supported by positive earning reporting and guidance by the companies, as well as improving Covid19 situation in general. Domestic market saw a large-cap-driven rally with ~IDR 13 trillion net foreign inflow into equity which was driven by domestic reopening and Indonesia favorable position as net-positive energy and commodity producer. In bond market, Bloomberg Barclays EM Local Currency: Indonesia Total Return Index Unhedged IDR went up +0.76% on monthly basis. Foreign outflow was seen after Brazil and Russia raised its interest benchmark rate by +150 bps and +75 bps respectively during October, due to rising inflation concern. But a combination of ample liquidity from onshore banks and stable IDR was able to absorb the volatility. On monetary side, Bank Indonesia maintained the BI 7D-RRR at 3.5%.
