FUND MANAGER COMMENTARY

In February 2022, the IDR Balanced Fund booked performance of +2.65%. In last month, global market corrected further due to concern on Fed tightening pace in the earlier part of the month as US announced high January inflation number, followed by Ukraine-Russia war in the later part of the month. In opposite, domestic market posted positive performance, supported by significant IDR17.5t equity net inflow, as investor view Indonesia position as net commodity producer favorably. In bond market, Bloomberg EM Local Currency: Indonesia Total Return Index Unhedged IDR went up by +0.64% on monthly basis. Meanwhile, market sentiment was relatively mixed as market participant started to expect modest policy-rate hike plan from previous forecast, after Russia invasion to Ukraine, which impacted the rising of global commodity price and stagflation concern.
