### FUND MANAGER COMMENTARY

In February 2022, IDR Equity Fund booked positive return of +2.56% mom, below the benchmark performance. By sector inside JCI, financial was the largest positive contributor (+2.2% mom), while consumer staples was the largest negative contributor (-0.1% mom). In last month, global market corrected further due to concern on Fed tightening pace in the earlier part of the month as US announced high January inflation number, followed by Ukraine-Russia war in the later part of the month. In opposite, domestic market posted positive performance, supported by significant IDR17.5t equity net inflow, as investor view Indonesia position as net commodity producer favorably. Going forward, Indonesia Equity market will continue to depend on the development of global and domestic factors such as development on Ukraine-Russia war as well as the policy reactions surrounding the war, fiscal and macro policy, as well as Covid-19 development.
