FUND MANAGER COMMENTARY

In July 2022, IDR China India Indonesia Equity Fund booked positive performance of +0.62% mom. Last month, global equity market rebounded driven mainly by less-hawkish Fed outlook, except for China market which corrected due to concern on its domestic property sector, growth outlook, and less visibility on economic reopening. Meanwhile, Indonesia and India equity markets performance followed the global market rebound amid positive 2Q22 earnings announcement and stabilizing oil price. Going forward, Indonesia, China and India equity markets will continue to depend on the development of factors such as development on inflationary pressure and subsequent policy reactions by central banks, economic and corporate earnings growth, and geopolitical situation globally.
