FUND MANAGER COMMENTARY

Global equities traded higher in April as markets reacted positively to the swift responses taken by central banks to provide liquidity and stabilize markets to avoid risk of contagion from the recent banking crisis. The increased in lending standards amongst banks, coupled with ongoing jitters in the banking industry, may put a cap on the hawkish attitude of central banks to slow down the pace of their interest rate hikes and take a more balanced approach in their monetary policies in the months ahead. As the midpoint of the Q1 2023 US corporate earnings season goes underway, majority of the companies that have reported their earnings have beaten analyst expectations with positive earnings surprises reported by companies. In Fixed Income, while markets have calmed down slightly after wild swings in March following the collapse of three US banks, there are plenty of uncertainties that will keep volatility abnormally high in the quarters ahead. This includes the sticky inflation, lingering market stress linked to the Banking sector as well as the risk of the US hitting its debt ceiling. It is increasingly likely that the lending conditions will be tightened further in coming months because of the routs amongst regional banks. Coupled with excess inventory build ups adding pressure to corporate profitability, it raises the odds of a recession before the end of the year in Developed Market economies. The Advances portfolios continue to be diversified while being tactically neutral on bonds and neutral on Investment Grade credits.
