## FUND MANAGER COMMENTARY

In August 2023, IDR Equity Syariah Fund booked negative performance of -0.87% mom, below the benchmark performance. Materials sector was the highest market gainer while industrial sector was the biggest drag for the market last month. Global equity markets corrected last month due to higher US Treasury yield following US credit rating downgrade and continued worry of a hawkish Fed, as well as continued China economic weakness and property developers credit default risk. That said, domestic equity market was able to close flat last month despite IDR20t net foreign outflows and Rupiah depreciation, partly given local investor optimism. Going forward, we believe the currently ongoing structural improvement in Indonesian economy with potentially a rising GDP/capita would be a strong, positive tailwind for Indonesian sharia equity market's upside potential in medium-to-long term.
