### FUND MANAGER COMMENTARY

In December 2023, IDR Balanced Fund booked performance of +2.30%. In last month, global equity market continued the rally, driven by expectation on sooner rate cut due to further dovish stance by the Fed, with the exception of China market that corrected amid sign of slow recovery. Domestic market also followed the global market rally with IDR 7.6t net foreign inflow. Bloomberg EM Local Currency: Indonesia Total Return Index Unhedged IDR went up by 1.26% on monthly basis. Positive sentiment came from lower global bond yields and the IDR strengthening of 0.73% monthly against the USD. The IDR appreciation was supported by Indonesia's trade surplus, where November's trade balance was recorded at USD 2.4 billion, extending the previous month's surplus of USD3.5 billion. Meanwhile, Bank Indonesia (BI) kept the BI 7-Day Reverse Repo Rate steady at 6% in December 2023 and BI signaled it will not be in a rush to cut its interest rates going forward.
