FUND MANAGER COMMENTARY

In December 2023, IDR China India Indonesia Equity Fund booked positive performance of +2.82% mom, in line with its benchmark performance. Last month, global equity market continued the rally, driven by expectation of a sooner-than-previously-expected rate cut due to a recently more dovish stance by the Fed, except for China equity market that corrected amid more signs of slow growth recovery. Indonesia and India equity markets also followed the global market rally with sizeable net foreign inflows. Going forward, even with upcoming Presidential election in India & Indonesia, the ongoing structural improvement in key Asian economies i.e. China, India & Indonesia, with potentially rising GDP/capita will become positive tailwind for a positive sustainable return in IDR CII Equity Fund in medium-long term horizon.
