FUND MANAGER COMMENTARY

In December 2023, IDR Equity Fund booked positive performance of +2.03% mom, albeit below the benchmark performance. Financial sector was the largest positive contributor (+1.5% mom), while Consumer Discretionary was the largest negative contributor (-0.3% mom). Last month, global equity market continued the rally, driven by expectation of a sooner-than-previously-expected rate cut due to a recently more dovish stance by the Fed, except for China equity market that corrected amid more signs of slow growth recovery. Domestic equity market also followed the global market rally with IDR 7.6t net foreign inflows. Going forward, even with an upcoming Presidential election and thus a change in President & Government, the ongoing structural improvement in Indonesian economy with potentially rising GDP/capita will become positive tailwind for a positive sustainable return in Indonesian equity market in medium-long term horizon.
