FUND MANAGER COMMENTARY

In February 2023, USD Prime Global Equity Fund booked performance of -2.67% mom, slightly above the benchmark performance. In last month, global market posted a correction due to reversal in US disinflation trend as strong inflation, labor market and other macro data led to expectation of higher-for-longer rates as well as due to profit taking in China market after reopening rally. Going forward, equity market will continue to depend on the development of global and domestic factors such as development on global inflationary pressure and subsequent policy reaction, global economic growth, and geopolitical situation.
