FUND MANAGER COMMENTARY

In January 2023, IDR Prime Equity Fund booked performance of 0.36% mom, slightly above the benchmark performance. By sector inside JCI, consumer discretionary was the largest positive contributor (0.8% mom), while energy was the largest negative contributor (-0.8% mom). In last month, global market in general posted a rally driven by China reopening and expectation of more dovish rate trajectory from the Fed. In the other hand, domestic market closed lower on month on month basis with correction in the first half of the month, driven by continuation of foreign fund rotation to chase China reopening, followed by rebound in the later half of month, driven by stronger macro data points and strengthening IDR from bond inflow. The equity net foreign flow shown the same pattern with month to date outflow peaked at IDR5.4tn in the mid of the month before retraced and closed at IDR3.1tn net outflow at the end of the month. Going forward, the potential of sustainable and structural improvement in Indonesian economy with rising GDP/capita will become positive tailwind for long term Indonesian equity asset class for medium-long term horizon.
