FUND MANAGER COMMENTARY

In January 2023, USD Onshore Equity Fund booked performance of +4.67% mom, above the MXID performance (in USD). By sector inside MXID, Materials was the largest positive contributor (+1.15% mom) and communication services (+0.75% mom). While Energy was the largest negative contributor (-0.46% mom). Stock markets started 2023 on a strong note with gains across global equities. China's reopening after dropping the zero-Covid policy in late December helped pushed additional positive sentiment. In addition there were early signs that inflation is easing from its highs in several major regions, supporting hopes that central banks may be close to the peak of their rate hiking cycle. Domestic, JCI weakened slightly by -0.2% on monthly basis, driven by foreign outflow, switching their flow into the North Asian market on the back of China reopening and cheaper valuation. Total foreign outflow reached IDR3.2tn (US\$205mn) in January 2023. Going forward, Indonesia Equity market will continue to depend on the development of global and domestic factors such as development on global inflationary pressure and subsequent policy reaction, global economic growth, and geopolitical situation.
