## FUND MANAGER COMMENTARY

In March 2023, USD Prime Global Equity Fund booked performance of +6.28% mom, above the benchmark performance. In last month, global market closed higher MoM with correction in the earlier part of the month due to Fed hawkishness as well as concern on global financial stability due to several banks failure in US and rebound in the second part of the month due to dissipating fear of contagion as Fed provided backstop program. Going forward, equity market will continue to depend on the development of global and domestic factors such as development on global inflationary pressure and subsequent policy reaction, global economic growth, and geopolitical situation.
