### FUND MANAGER COMMENTARY

In October 2023, IDR Equity Fund booked negative performance of -5.58% mom, below the benchmark performance. Utilities sector was the largest positive contributor for the market last month (+1.9% mom), while Financials was the largest negative contributor (-1.4% mom). Last month, global equity market corrected, driven by 10-year US treasury yields rally that touched 5.0% level before closing at 4.9% at the end of the month, amid concern of oversupply. Domestic market also saw a correction amid IDR weakening against USD (2.8% MoM weakening, closed at IDR15,885USD) despite a 0.25% rate hike surprise by Bank Indonesia. This heightened market volatility was partly anticipated, and such volatility may continue in the near term. However, we believe this could present a good window of opportunity to accumulate quality domestic equities, because the ongoing sustainable and structural improvement in Indonesian economy with potential growth in GDP/capita will become positive tailwind for Indonesian equity asset class in the long run.
