## FUND MANAGER COMMENTARY

The Federal Reserve has maintained their rhetoric that the fight for inflation is not over. We assess that a stable bond market is needed to provide the next leg up for risk assets. Over the short term, current economic releases do not suggest that US is about to enter a recession imminently. The US labour market remains resilient though there are some tentative signs of slowing. In addition, earnings are not expected to dip meaningfully in the near term. In such an environment, investors should not preclude the scenario of risk assets holding up over the short term. Given the confluence of forces pulling asset markets in different directions, the focus for the Advanced Funds is to construct a well-diversified portfolio with balance risk on both directions.
