FUND MANAGER COMMENTARY

In September 2023, USD Global Growth Opportunity Equity Fund booked negative performance of -4.27% mom, in line with benchmark performance. Last month, global equity market corrected due to concern on the Fed keeping rates higher for longer that pushed US treasury yield higher as well as concern on China property developer credit default issue. Going forward, global equity market may continue to see a high level of volatility in near term, depending on the development in global inflationary pressure and the subsequent macro policy reactions and growth implications, as well as global geopolitical situation. However, such volatility may present a window of buying opportunities.
