FUND MANAGER COMMENTARY

In December 2024, IDR Growth Equity Syariah booked negative performance of -1.58% mom, below the benchmark performance. In terms of sectors inside Indonesia Sharia Stock Index, Energy was the largest positive monthly contributor (+0.67%mom), while Materials was the largest negative contributor (-0.62%mom). Last month, Global equity market dipped in December 2024 but overall, still finished the year with a gain. The December market weaknesses was largely due to continuing US dollar strength and heightened concern over US tariff escalation. Among the major regions, MSCI China was the best performer (+2.6% MoM). Domestically, JCI did not experience any window-dressing this December as most of the large-caps continue to underperform with investors remained worry about higher-for-longer stance from US Fed, which then affected the Rupiah to weakened again by -1.6% MoM to Rp16,102/USD in December 2024. Foreign investors continued their selling spree into December 2024 as they recorded another net outflow amounting to -Rp5.0tn, decelerating compared to -Rp16.8tn in November 2024. Going forward, the potential of sustainable and structural improvement in Indonesian economy with rising GDP/capita will become positive tailwind for long term Indonesian equity asset class for medium-long term horizon.
