### FUND MANAGER COMMENTARY

In February 2024, IDR Equity Fund booked positive performance of +2.42% mom, 2.27% above the benchmark performance. Financial sector was the largest positive contributor for the fund, followed by Communication Services and energy sectors. Last month, Indonesia equity market was slightly up mom as foreign inflows continued following quick count result of a one-round Presidential election victory by Prabowo-Gibran pair in mid-Feb. Local investors, however, were taking some profit. Meanwhile, global equity market posted a positive performance on resilient economic data and relatively strong earnings result. China equity market also booked a strong rebound, with MSCI China +8.6% mom. Going forward, we believe the potentially more pro-growth government regime ahead and the continuation of ongoing structural improvement in Indonesian economy with potentially rising GDP/capita will become positive tailwind for a sustainable, positive return in Indonesian equity market in medium-long term horizon.
