### FUND MANAGER COMMENTARY

In July 2024, IDR Prime Equity Fund booked positive performance of +2.45% mom, slightly below the benchmark performance. By sector inside JCI, energy was the largest positive contributor (+1.1% mom), while utilities was the largest negative contributor (-0.7% mom). Last month, global equities rose moderately driven by Japan, South Africa, and India. The semi/AI trade was then further pressured by geopolitics. Potential additional US scrutiny of sales of chip-making equipment to China. A sharp increase in betting odds in favor of a Republican presidential win brought this news into sharper focus. ECB kept the rates unchanged as expected after cutting 25bps in June, ECB maintained its interest rates in July. JCI continued its momentum from June into July with foreign investors turned net buyer as they recorded a net foreign inflow of Rp6.7tn in July 2024, compared to the net foreign outflow of Rp3.6tn seen in June 2024. The large-banking names were the main drivers for the index as quality earnings improvement were seen across these names, despite previous concern on liquidity and asset-quality. Going forward, the potential of sustainable and structural improvement in Indonesian economy with rising GDP/capita will become positive tailwind for long term Indonesian equity asset class for medium-long term horizon.
