FUND MANAGER COMMENTARY

In June 2024, IDR China India Indonesia Fund booked performance of +3.61% mom, above the benchmark performance. This is predominantly driven by our outperformance in Indonesia and China. By sector inside MSCI Indonesia, Financials were the largest positive contributor (+3.1% mom), while Materials were the largest negative contributor (-0.84% mom). Last month, Global equities continued their rally with most regions saw positive returns in June, spearheaded by EM and US. US continues to dominate global equity landscape led by Magnificent 7. In June 2024, nowcast for the US GDP continued to reflect positive growth. Eurozone equities suffered by among other things, political worries. Political uncertainty arose after President Macron's unexpected dissolution of the National Assembly in France following the European Parliament election results on 9 June. Indonesian market rebounded nearing the month end after Sri Mulyani came out with the joint statement with Prabowo's team on the maximum 3% fiscal budget limit for 2025. Net foreign outflow declined to Rp 4Tn in June 2024 from Rp 14Tn in May 2024. Rupiah weakness persists as foreign investors were worried about Indonesia's fiscal plan during Prabowo's presidency era after Bloomberg posted an article about the 50% debt-to-GDP ratio. Going forward, the potential of sustainable and structural improvement in Indonesian economy with rising GDP/capita will become positive tailwind for long term Indonesian equity asset class for medium-long term horizon.
