FUND MANAGER COMMENTARY

The USD Fixed Income Fund experienced a positive return of +1.08% in June 2024. This was influenced by the 10-year US Treasury yield and USD Indonesia Government bond yield, which both decreased by -10 bps and -14 bps to 4.40% and 5.16%, respectively. Meanwhile, some central banks in Europe, such as Denmark, Hungary, and Switzerland cut their interest benchmark rate in June. As a result, the market sentiment was driven by increasing investors' optimism on the potential of Fed rate cuts going forward.
