FUND MANAGER COMMENTARY

In March 2024, IDR Equity Syariah Fund booked negative performance of -0.69% mom, below the benchmark performance. During the month, investors took some profit from election related sectors to more cyclical sectors. For JII, the biggest positive contributors were Materials sector +2.23% MoM and Energy +0.98% MoM. While the largest negative contributor were Communications services -2.04% MoM and Consumer Discretionary -0.3% MoM. In March, global equity market posted a positive performance. In the US, Fed's meeting revealed projections of better-than-expected US economic growth this year supporting to a no hard-landing scenario. In addition, the Fed is still indicating a possibility of rate cuts in 2024. China markets rallied post the China National People's Congress which set a GDP growth target of 5% and continued improving economic data. Going forward, we believe the potentially more pro-growth government regime ahead and the continuation of ongoing structural improvement in Indonesian economy with potentially rising GDP/capita will become positive tailwind for a sustainable, positive return in Indonesian equity market in medium-long term horizon.
