FUND MANAGER COMMENTARY

In March 2024, USD Prime Global Equity Fund booked positive performance of +2.08% mom, slightly below the benchmark performance. Last month, global equity market posted a good performance. Diminishing odds of recession, a still dovish Fed, and resilient corporate earnings combined to drive strong equity returns in March, as well as through the first quarter. US outperformance continued. The Nikkei was in the vanguard, returning over 20% in Q1 and finally reclaiming the highs of late 1989. Going forward, equity market will continue to depend on the development of global and domestic factors such as development on global inflationary pressure and subsequent policy reaction, global economic growth, and geopolitical situation.
