FUND MANAGER COMMENTARY

Global equities bounced back in May 2024, recovering the losses in April 2024. For the month ending May 2024, Information Technology, and Communication Services led while Energy, Consumer Discretionary and Consumer Staples lagged. In terms of investment styles, Quality and Growth led while Minimum Volatility and High Dividend Yield lagged. Across the major geographic regions, Europe equities outperformed, while China equities lagged. Fundamentals continue to hold up with earnings growth poised to continue their positive trajectory. There are signs that economic growth could be slowing though unlikely at recessionary levels. It is likely rate hike cycle is behind us and that removes a headwind to risk assets. Dips in equity market seen in April saw a rapid recovery, which is a characteristic of an equity bull market. The outlook for equities over the medium term remains constructive.
