FUND MANAGER COMMENTARY

In November 2024, IDR China India Indonesia Equity Fund posted -5.03% MoM return, relatively in line with the benchmark. Post Trump election victory, MSCI Indonesia is the worst performing with -6.1% correction, whereas China dropped -2.8%, and MSCI India delivered +54 bps MoM return. The main reason of Indonesia weakness lies on USDIDR that reached close to 16,000 in the month of November, on the back of strong DXY that peaked at 107.6. the weakness in currency brought heavy outflow from the equity asset class, with QTD outflow reached USD -1.7 billion. Going forward, equity market will continue to depend on the development of global and domestic factors such as development on global inflationary pressure and subsequent policy reaction, global economic growth, and geopolitical situation.
