## FUND MANAGER COMMENTARY

In November 2024, USD Adventurous Fund booked positive performance of +2.79% mom but underperforming the benchmark. Global equities bounced back from the decline in October 2024. Across the major geographic regions, US equities led, while Asia equities lagged in conjunction with Trump's victory in the US presidential election. President-elect Trump's pledges to cut taxes and focus on deregulation have proven to be a tailwind for U.S. equities. In contrast, his threats of imposing 25% tariffs on Canada and Mexico, along with a 10% increase for China, have further dented already depressed EM investor sentiment. The fixed income markets delivered positive returns in November 2024. US Treasuries, Investment Grade and High Yield indices all were up in November 2024. Treasuries index was up as US 10-year yield declined in November 2024. Our assessment is that we remain in an equity bull market. The pull-back in October 2024 was quickly bought into and equities bounced back in November 2024. The conclusive results of the US election removed political uncertainty and helped boost risk sentiment.
