### FUND MANAGER COMMENTARY

In November 2024, USD Prime Global Equity Fund booked positive performance of +3.14% mom, below the benchmark performance. Last month, Global equities bounced back from the decline in October 2024. Across the major geographic regions, US equities led, while Asia equities lagged in conjunction with Trump's victory in the US presidential election. President-elect Trump's pledges to cut taxes and focus on deregulation have proven to be a tailwind for U.S. equities. In contrast, his threats of imposing 25% tariffs on Canada and Mexico, along with a 10% increase for China, have further dented already depressed EM investor sentiment. Going forward, equity market will continue to depend on the development of global and domestic factors such as development on global inflationary pressure and subsequent policy reaction, global economic growth, and geopolitical situation.
