

FUND FACT SHEET

USD ADVANCED CONSERVATIVE FUND

PT AIA FINANCIAL licensed and supervised by the Financial Services Authority

31 October 2024

PT AIA FINANCIAL

Established in 15 July 1996, PT. AIA FINANCIAL (AIA) is one of the leading life insurance companies in Indonesia that licensed and supervised by the Indonesian Financial Services Authority. AIA Indonesia is a subsidiary of AIA Group Limited, the largest independent publicly listed pan-Asian life insurance group. With experienced personnel, AIA's Investment team has the proficiency to identify economic conditions and investment movements to generate competitive investment returns through a variety of financial instruments such as money market, bonds, shares and/or mutual funds.

INVESTMENT OBJECTIVE

The primary objective of the Portfolio is to achieve long-term optimum total return with the appropriate level of capital risk by holding AIAIM SICAV sub-funds investing in equities, bonds and other fixed income securities in global markets, as well as investment in those types of assets.

FUND MANAGER COMMENTARY

In October 2024, USD Advanced Conservative Fund booked negative performance of -2.73% mom, underperforming the benchmark. Global equities declined in October 2024, halting the run of 5 consecutive months of positive returns. In terms of investment styles, Momentum and Growth led while Value and High Dividend Yield lagged. Across the major geographic regions, US equities led, while India equities lagged. The fixed income markets also declined in October 2024. US Treasuries, Investment Grade and High Yield indices all were down in October 2024. Treasuries index declined as US 10-year yield increased significantly in October 2024. In view of the upcoming risk events such as the US election and the significant increase in US bond yield, the Elite Funds managed by AIAIM have modestly brought down allocation to equities while still retaining an Overweight Equities stance. This move is to create additional capacity for the Elite Funds managed by AIAIM to increase risk taking should markets stabilize post the risk event.
