■ TD + Cash

### FUND MANAGER COMMENTARY

In September 2024, USD Prime Greater China Equity Fund booked positive performance of +16.22% mom, above the benchmark performance. Global equities continued to rally in September 2024 (MSCI World +2.2% MoM) and has delivered 5 consecutive months of positive returns. Among major regions, MSCI China was the best performer (+23.6% MoM), followed by South Africa (+5.8%) while MSCI Japan/Brazil were the weakest (-1.3%/-1.0% respectively). China has unleashed a series of aggressive monetary stimulus measures to resuscitate its faltering economy. The range of actions announced represent the most significant stimulatory action taken since 2015. The move precipitated a fierce rally across China's equity market, with the MSCI China index gaining over 23% through September, the second-largest monthly gain this century. Market now anticipates additional fiscal measure to reinforce these efforts. Going forward, equity market will continue to depend on the development of global and domestic factors such as development on global inflationary pressure and subsequent policy reaction, global economic growth, and geopolitical situation.
