## FUND MANAGER COMMENTARY

In April 2025, IDR Equity Syariah Fund booked positive performance of +8.95% mom, below the benchmark performance. In April 2025, JCI experienced significant volatility, marked by sharp declines and strong recoveries. On the 8th of April, the JCI plunged by -9.2% at market open marking the largest single-day drop since June 2021. The sell-off came after the long Eid al-Fitr holiday amid global concerns following the U.S. tariff announcements. The rupiah also sharply depreciated, hitting an all-time low of IDR 16,850 per U.S. dollar. The market only recovered after the tariffs were postponed for 90 days and tensions between the US & China de-escalated. Foreign investors recorded another sizable net outflow amounting to Rp17.6tn (US\$1.1bn) for the month, while the Rupiah weakened -0.3% mom. In terms of sector inside JAKISL, largest positive contributors were Materials (primarily AMMN LJ), Communication Services, and Consumer Staples. Going forward, equity market volatility may remain high especially with the on-going US tariff negotiations and the macroeconomic impact from it. That said, we continue to believe that the potential of sustainable and structural improvement in Indonesian economy with potentially rising GDP/capita could become a positive tailwind for long-term Indonesian equity market return, as such at current market levels we think it could offer a good market entry opportunity with an attractive risk-reward.
