## FUND MANAGER COMMENTARY

In April 2025, USD Prime Greater China Equity Fund booked negative performance of -5.82% mom, below the benchmark performance. Last month, Markets across the globe were thrown into turmoil in April, with the Trump administration's tariff policy deeply undermining confidence. It was a volatile April 2025 which saw global equities starting the month under pressure due to the Liberation Day announcements. However, a 90-day reprieve announced by the US administration coupled with expectations of trade catalyzed a strong rebound in the equity markets. April has been a turbulent month for China equity market, as weaker macro and tariff headlines continue to weigh in market sentiment. China's first quarter of 2025 GDP actually was better than expected growing by +5.4%. Going forward, equity market will continue to depend on the development of global and domestic factors such as development on global inflationary pressure and subsequent policy reaction, global economic growth, and geopolitical situation.
