FUND MANAGER COMMENTARY

In August 2025, USD Prime Greater China Equity Fund booked positive performance of +5.55%MoM, significantly outperforming benchmark by 310bps. Last month, Global equity market continued to rally for the fifth consecutive month with DM outperforming EM led by US equities. Across the major geographic regions in USD terms, onshore China equities led, while India equities lagged in August 2025. The downbeat US NFP report and significant downward revisions in prior employment data have raised concerns about US economic growth and the health of the job market. MSCI China hit its highs for the year in August driven by the top-down perspective such as US-China tariff pause to November 10th, rising expectations for Fed's rate cut, abundant onshore liquidity going into equities.
