FUND MANAGER COMMENTARY

In December 2025, positions that contributed positively to our performance was helped by our holdings in the metal mining sector particularly the gold miners as gold price rebounded towards USD4300-4400/oz in the second half of the month. Meanwhile our underweight position in SOE banks contributed positively, as ongoing uncertainties which led investors to adopt a more cautious stance. Meanwhile, positions that contributed negatively to our exposure to the plantation sector, as investor concerns increased regarding the potential for additional government actions on plantation companies, particularly following the recent flood events in Sumatra. Consumer-related names also underperformed during the month.
