### FUND MANAGER COMMENTARY

In February 2025, IDR Equity Syariah Fund booked negative performance of -10.51% mom, slightly below the benchmark performance. Domestic equity market declined materially during the month with JCI down -11.8% and JAKISL -9.9% respectively. Contributing factors were, escalating global trade tensions and recent domestic policy developments including concerns on budget reallocations, the establishment of Danantara, and noises on cabinet reshuffles. In terms of sector inside JAKISL, largest negative contributors were Materials, Communication Services, and Consumer Staples. Foreign investors continued their selling spree in Feb-25 as they recorded another net outflow amounting -Rp15.4tn (-US\$944mn). Going forward, upon recent clarity on new US tariff implementation and the retaliatory tariffs by the other countries, equity market volatility may remain high. That said, we continue to believe that the potential of sustainable and structural improvement in Indonesian economy with potentially rising GDP/capita could become a positive tailwind for long-term Indonesian equity market return, as such current market weakness and the attractive market valuation (-2SD below mean) could offer a good market entry opportunity with an attractive risk-reward.
