FUND MANAGER COMMENTARY

In July 2025, IDR China India Indonesia Equity Fund booked negative return of -1.15% MoM, below performance by 51 bps. Last month, MSCI Indonesia returned flat performance, driven by uber expensive stock like Barito Pacific that went up 58%. On the other hand, the large-cap banks were the top detractors with Bank Mandiri (-10.25%), Bank BCA (-4.34%), Bank BRI (-3.13%). Foreign investors continued to remain as the better sellers of the market as they recorded another sizable net outflow of Rp8.3tn the strongest market was China which rose by +4.5% MoM while on the other spectrum India fell by -3.2%MoM. DXY gained by +3.2%MoM through the course of the month. The US economy remained resilient with US earnings season has been strong thus far, with earnings surprising to the upside, driven by tech companies. At the macro level, China market benefited from continued US-China trade-talks, Chinese biotech's out-licensing deals and Macau's above-expectation gaming revenue. Whereas, Indian higher than expected US tariff affect overall market confidence. That said, we continue to believe that the potential of sustainable and structural improvement in Indonesian economy with potentially rising GDP/capita could become a positive tailwind for long-term Indonesian equity market return, as such at current market levels we think it could offer a good market entry opportunity with an attractive risk-reward.
