### FUND MANAGER COMMENTARY

In July 2025, USD Prime Emerging Market Equity Fund booked positive return of +1.25%MoM, underperforming benchmark performance by 52 bps. Last month, Global market continued to rally with MSCI World gaining +1.3% MoM. The strongest market was China which rose by +4.5% MoM while on the other spectrum India fell by -3.2%MoM. DXY gained by +3.2%MoM through the course of the month. The US economy remained resilient with US earnings season has been strong thus far, with earnings surprising to the upside. At the macro level, China market benefited from continued US-China trade-talks, Chinese biotech's out-licensing deals and Macau's above-expectation gaming revenue. That said, we continue to believe that the potential of sustainable and structural improvement in Indonesian economy with potentially rising GDP/capita could become a positive tailwind for long-term Indonesian equity market return, as such at current market levels we think it could offer a good market entry opportunity with an attractive risk-reward.
