## FUND MANAGER COMMENTARY

In March 2025, IDR China India Indonesia Equity Fund posted +4.96% below benchmark performance. China equity market continue its positive performance in March 2025 (delivered 1.7% performance), with India posting +9% MoM performance. Indonesian equity market experienced heightened volatility despite posting positive 6% MoM performance, on March 18th the index plunged by 7.1%, triggering the first trading halt since COVID. The market's downturn reflected broader anxieties about Indonesia's economic stability, including fears of deflation and a decrease in consumer confidence. Additionally, rumors about potential changes in the finance ministry further unsettled investors. In response to these market conditions, the Financial Services Authority (OJK) implemented measures to stabilize the market, such as allowing publicly listed companies to repurchase shares without prior shareholder approval.
