FUND MANAGER COMMENTARY

In March 2025, USD Onshore Equity Fund booked positive performance of +4.42% mom, below the benchmark performance. In March 2025, JCI experienced significant volatility, marked by sharp declines and temporary recoveries. On March 18, the JCI plunged by -7.1%, triggering a temporary trading halt – the steepest drop since 2011. Contributing factors were weakening consumer spending and confidence, fiscal policy worries, and political uncertainty. Concerns over escalating US tariff policies also escalated capital flight. That said, the Indonesian Government's regulatory and monetary responses helped aid some confidence back to the market at month end. Including eased share buyback regulations, more clarity on key cabinet positions, as well as BI safeguarding the Rupiah. In terms of sector inside MXID Index, largest positive contributors were Information Financials, Industrials, and Consumer Discretionary. Foreign investors recorded another net outflow of -Rp8.1tn (-US\$490mn) in March which was better compared to the -Rp15.4tn (-US\$944mn) outflow in Feb25. The Rupiah declined another -0.5% m-m in Mar25 vs USD. Going forward, equity market volatility may remain high especially regarding US tariff policies and the potential retaliatory. That said, we continue to believe that the potential of sustainable and structural improvement in Indonesian economy with potentially rising GDP/capita could become a positive tailwind for long-term Indonesian equity market return, as such current market weakness and the attractive market valuation (-2SD below mean) could offer a good market entry opportunity with an attractive risk-reward.
