### FUND MANAGER COMMENTARY

In November 2025, USD Global Growth Opportunity Equity Fund booked -0.99%MoM, below benchmark performance. Last month, Global equity market fell in November with MSCI World sliding into 0.1%. EM underperformed DM by 265bps through the month. Strongest market was India which rose +1.6%. The two biggest drivers of this were the hawkish turn at the October FOMC and renewed concerns about market concentration in AI names. China market posted a correction in November on the back of Renewed US equity market volatility, owing to rapid swings in Fed rate cut expectations and a lack of official macro data, triggered a global risk-off. Handsome gains through the first three quarters of the year saw broad-based profit-taking before year end. We are moderately constructive on the outlook for risk assets over the medium term.
