- IShares Core MSCI China ETF
- Schroder Int. Greater China AAC MF
- TD + Cash

FUND MANAGER COMMENTARY

In April 2026 USD Prime Greater China Equity Fund booked +11.13%MoM, which was below benchmark performance. Last month, Notwithstanding the elevated oil price, Global equity markets staged a strong rally in April 2026 and more than recovered the losses in March 2026. Across the major geographic regions in USD terms, Asia equities led while Europe equities lagged in April 2026. China Equities also posted a rebound in April but underperformed its North Asian peers. AI infra beneficiaries drove the strong performance. Despite leadership from semis and tech hardware, heavyweight internet names lagged amid soft earnings outlooks. Beyond tech, cyclicals saw a meaningful recovery, most notably Real Estate on signs of housing stabilization, Energy/Materials on tighter supply-demand dynamics, and Industrials on the new energy ecosystem build-out. China's 1Q GDP and March activity data showed economic resiliency, although some cooling took place in March. We are moderately constructive on the outlook for risk assets over the medium term.
