FUND MANAGER COMMENTARY

In July 2026, USD Advanced Balanced Fund booked +0.48% mom, which was above the benchmark performance. Last month, Global market rose in July, with MSCI World was muted and Emerging Market underperformed Developed Market. MSCI China and Brazil were the outperformers while Korea and Taiwan were the weakest. Concerns had surfaced in late June about the sustainability of AI capex due to hyperscalers' financing and monetization challenges and competition from China. But the resultant wobble in AI stocks was amplified by an intense positioning unwind including from equity hedge funds and leveraged ETFs in Korea in July. In July 2026, fixed income markets retreated. US treasuries, US investment grade corporate bonds and US high yield bonds all posted negative returns in July 2026. US government bond yield rose significantly in July 2026 on the back of oil price increases and rate hike expectations. We are moderately constructive on the outlook for risk assets over the medium term.
