FUND MANAGER COMMENTARY

In July 2026, USD Global Growth Opportunity Equity Fund booked -0.09% MoM which is above benchmark performance. Last month, Global market rose in July, with MSCI World was muted and Emerging Market underperformed Developed Market. MSCI China and Brazil were the outperformers while Korea and Taiwan were the weakest. Concerns had surfaced in late June about the sustainability of AI capex due to hyperscale's financing and monetization challenges and competition from China. But the resultant wobble in AI stocks was amplified by an intense positioning unwind including from equity hedge funds and leveraged ETFs in Korea in July. MSCI China gained +8.6%MoM and the gap between AI vs Non-AI performance narrowed as crowded AI positions unwound and capital rotated into laggards. global AI stocks came under pressure as investors intensified scrutiny of AI monetization timelines, hyperscale's FCF generation, AI capex sustainability, and financing conditions, as reflected in a sharp widening of CDS spreads. The resulting de-risking quickly spilled into China's tech space, where elevated valuations and crowded positioning left AI beneficiaries particularly vulnerable. We are moderately constructive on the outlook for risk assets over the medium term.
