FUND MANAGER COMMENTARY

In June 2026, IDR Growth Equity Syariah Fund booked -5.83% MoM (net), above the benchmark performance. Indonesian equities saw another month of sharp sell-off, with the JCI and ISSI Index declining -7.9% MoM and -8.8% MoM respectively. The month was defined by idiosyncratic Indonesia-specific headwinds — rupiah weakness, aggressive monetary tightening, policy uncertainty, and a looming MSCI reclassification risk — rather than a broad EM selloff. The rupiah breached the 18,000-per-dollar level in early June, hitting fresh record lows. BI responded with an off-cycle 25bp rate hike, followed by another 25bp on June 18 (to 5.75%) — its third hike in a month. Investor confidence was rattled by a series of perceived policy missteps under President Prabowo. Additionally alleged graft case drove foreign investors risk-off. Foreign investors recorded a net equity outflow of Rp25.1tn (US\$1.4bn) in Jun 2026, bringing YTD net foreign outflows in equities to Rp82tn (US\$4.8bn). Within ISSI Index, all sectors delivered negative except for Energy. The largest negative contributors came from Materials, Communications, and Industrials. We expect equity markets to remain volatile in the near term amid geopolitical tensions and continued rupiah weakness. However, we maintain our view that Indonesia's long-term equity outlook remains supported by the potential for sustainable and structural economic improvements, including rising GDP per capita. At current levels, we believe the market offers an attractive entry point with favourable risk-reward for long-term investors.
