FUND MANAGER COMMENTARY

In March 2026, IDR Prime Equity Fund recorded -9.48% MoM which was significantly above benchmark performance. The equity market saw deep correction in March, JCI Index down -14.4% and MXID -15.5% mom. Making it one of the worst performers among major global indexes. Investors turned risk-off as conflict in Middle East escalated between US-Israel-Iran. Rupiah continued to weaken against USD by 1.3% and it broke the psychological level of Rp17,000 by Mar 31. Oil price touched as high as US\$118/bbl during the month, raising concern from investors on Indonesia's ability to maintain the 3% fiscal deficit limit. In response, the government announced efficiency programs amounting to Rp80tn from non-priority ministerial spending and Rp40tn from the Free Meal program. In addition, Fitch downgraded Indonesia's outlook to negative adding further negative sentiment. All sectors in MXID saw negative returns in March, with Financials, Materials, and Communications seeing the biggest correction. Foreign investors recorded net outflow of Rp 9.6Tn in Mar 2026, vs Rp 2.3Tn outflow in Feb 2026. That said, we continue to believe that the potential of sustainable and structural improvement in Indonesian economy with potentially rising GDP/capita could become a positive tailwind for long-term Indonesian equity market return, as such at current market levels we think it could offer a good market entry opportunity with an attractive risk-reward.
