FUND MANAGER COMMENTARY

The USD Fixed Income Fund experienced a negative return of -2.85% in September 2026. This performance was influenced by a 54 bps rise in the 10-year Indonesia Government USD bond yield to 6.22% and the 10-year US Treasury yield up by 53 bps to 5.28%. The dominant driver was Federal Reserve raised the fed funds rate by 25bps to 3.75-4.00%, its first hike since July 2023, as policymakers stepped up efforts to contain persistent inflation and signalled that another hike could follow before year-end. The decision comes as inflation remains elevated, with renewed oil-price pressures complicating the disinflation outlook and reinforcing the Fed's more restrictive policy stance.
