FUND MANAGER COMMENTARY

In March 2025, IDR Balanced Fund booked performance of +2.10% MoM, below the benchmark performance. In March 2025, JCI experienced significant volatility, marked by sharp declines and temporary recoveries. On March 18, the JCI plunged by -7.1%, triggering a temporary trading halt – the steepest drop since 2011. Contributing factors were weakening consumer spending and confidence, fiscal policy worries, and political uncertainty. Concerns over escalating US tariff policies also escalated capital flight. That said, the Indonesian Government's regulatory and monetary responses helped aid some confidence back to the market at month end. In terms of sector inside MXID Index, largest positive contributors were Information Financials, Industrials, and Consumer Discretionary. Foreign investors recorded another net outflow of -Rp8.1tn (-US\$490mn) in March which was better compared to the -Rp15.4tn (-US\$944mn) outflow in Feb25. The Rupiah declined another -0.5% m-m in Mar25 vs USD. Bloomberg EM Local Currency: Indonesia Total Return Index Unhedged IDR recorded negative return by -0.17% on monthly basis, and the 10-year government bond yield increased by 9 bps to 7.00%. Market sentiment came from rare fiscal deficit of IDR -23.45 trillion in January on sluggish tax revenues and foreign reserves fell to USD 154.5 billion in February, down from USD 156.1 billion in the previous month.
